

Welcome to the PDF Q&A bot!

This document is used to test how well the bot can answer questions from a PDF file.

It is powered by LangChain and OpenAI APIs.

You can ask questions such as:

- What is this document about?
- Which technologies are used?
- Who is the target user?

RAG (Retrieval-Augmented Generation) is used to retrieve relevant chunks from this PDF.

The answers are generated using GPT-3.5.

Hope you enjoy experimenting with it!
